Your platform for innovation.

Australia and New Zealand's largest Oracle partner

- The ANZ region's first full-service provider
- Most awarded Oracle partner in the Asia Pacific
- Key strategic partner
- Platinum Partner
- Cloud Select Partner
- Cloud managed services provider

PaaS market leaders

- The industry's widest PaaS capability portfolio
- 75+ PaaS experts across the ANZ region

SaaS and IaaS have changed everything, enabling businesses to harness all the benefits of the Cloud to be more agile, collaborative and innovative. Greater stability. Better security. Almost infinite, instant scalability. But there's something missing from the aaS equation if you want to equip your people with unique technology and functionality that provides a sustainable competitive edge: PaaS.

With PaaS at Red Rock, you have all the security, development, mobility, big data, analytics and database building blocks to create whatever evolving end-to-end technology solutions you need.

All managed by our Oracle® PaaS specialists. All integrated seamlessly with your existing Cloud or hybrid solution. All delivered in double-quick time on a cost-effective pay-for-use basis.

**Tap into the transformative potential of PaaS**

As Australia and New Zealand's largest Oracle partner, with the backing of the DXC global network, we have unrivalled end-to-end solution-building capabilities spanning the full industry mix and the Oracle technology spectrum, including PaaS.

In fact, we have the greatest depth of PaaS expertise across the region and the industry's broadest PaaS portfolio, with proven experience and invaluable IP gained across practically every business sector.

The benefits of an integrated PaaS solution

When we combine the benefits of Oracle's IaaS and SaaS with Oracle's PaaS, we're able to create a seamless end-to-end solution that unlocks a new level of technological innovation, agility and insight.

Develop custom applications. Integrate technologies and systems. Dig into deeper analytics and data. Build, test, deploy and integrate with greater ease, choice, built-in intelligence and security than ever.
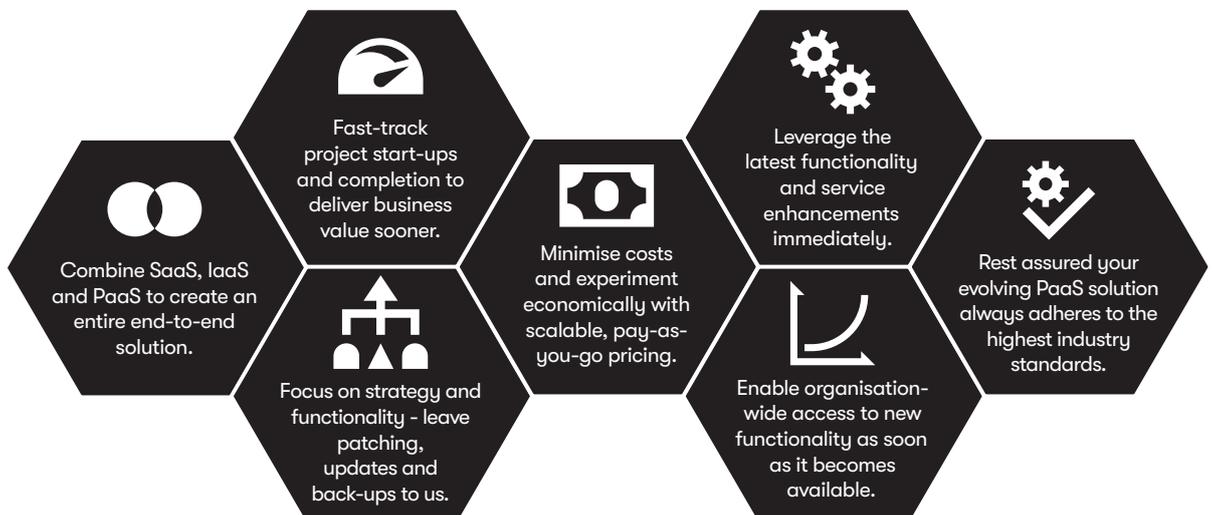

Our PaaS capabilities

Analytics and visualisation

PaaS opens up a world of data analytics, visualisation and business intelligence options and capabilities, making it easier for your business to minimise costs and waste while maximising performance and productivity across your organisation. Tap into a new generation of flexible, integrated reporting, dashboards, visualisation, forecasting, budgeting and planning functionality.

Mobility and chatbots

PaaS gives you the freedom and power to connect your people in new, more flexible and intuitive ways and free up talent to focus on work and innovation. Develop customised mobile apps to promote anytime-anywhere collaboration across your organisation and embed chatbots into the fabric of your business to streamline a whole host of everyday support and service interactions.

Data and application integration
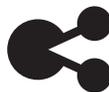

Take a lead in the API economy with unrivalled data integration and API development capabilities powered by PaaS. Whether your priority is Cloud-to-Cloud, Cloud-to-on-premise or embracing the IoT, connecting and enabling your people and customers to engage seamlessly across the enterprise landscape and technology mix is easier and more cost-effective than ever.

Security

Integrated artificial intelligence and built-in security across every layer means your PaaS solution provides the ultimate in anticipatory, ever-evolving protection from hackers, malware and as-yet-unknown risks. Enjoy the benefits of a market-leading, single-sign-in user authentication and authorisation platform that integrates seamlessly with on-premise Active Directories.

Cloud application development

A fully integrated PaaS development environment enables you to use multiple popular programming languages and technologies, including open source products, to create and deploy custom applications, fast. Utilise the latest agile development techniques, application development frameworks, containerisation technologies and lifecycle management best practices.

Big data

Collecting and actively managing data to extract business-critical insights from the growing wealth of information available to your business is simpler and more secure with PaaS. From master data management, data warehousing and data modelling, to data profiling, conversion, cleansing, migration and consolidation, PaaS equips your business to gain an even bigger edge from big data.

Databases

PaaS makes Database as a Service an operationally viable, financially desirable option for organisations of all sizes, not just large enterprises. Our specialists make the switch to the Cloud quick and cost effective, automating much of the ongoing database management workload, so you can develop, test, produce and scale solutions – database solutions that actively reduce costs and support innovation – more easily than ever.
